Vice President, Transfusion Medicine, Standards & Accreditation, Regulatory

Re: Errata for *Standards for Immunohematology Reference Laboratories*, 9th edition

Please make note of one change and one error in the *Standards for Immunohematology Reference Laboratories*, 9th edition.

Reference Standard 2.2A Minimum Inventory Resources

In the interim from publication to implementation the Vel system was assigned its own ISBT system number. With this change, the generic number of “901” was replaced with its new number, “034.”

The reference standard appears correctly below.

Reference Standard 2.2A. Minimum Inventory Resources*					
System or Collection Name/ISBT Symbol	System or Collection No./Antigen No.	Antisera	No. of Examples	RBCs	No. of Examples
Vel/VEL	901 034 / 001	Vel	2	Vel-	2

Reference Standard 2.2B Additional Inventory Resources

During the development of this edition, the system numbers for 014/001 and 014/002 under Dombrock should have been removed. However, the change was not made.
